EDUCATION

University of Texas at Austin

Bachelor of Science in Art and Entertainment Technologies

Austin, TX

Present

Southern New Hampshire University

Bachelor of Science in Business Administration

Online

Present

PROJECTS

Unity Gameplay & Systems Development | <https://github.com/adeoja> | <https://adeoja.itch.io> 2024 - Present

- Architected modular, designer-friendly systems in C# including a ScriptableObject-based dialogue framework enabling non-programmers to craft branching narratives, and reusable gameplay systems for 2D/3D movement, gravity manipulation, and player interaction.
- Implemented robust architectural patterns (Singleton, FSM, event-driven systems) balancing technical rigor with rapid prototyping flexibility for exploring experimental gameplay concepts.
- Created polished, responsive player experiences through physics-based character controllers, procedural systems (object spawners, checkpoints), and feedback-rich UI with TextMeshPro integration.

Unpaused - Game Design Document | adeoja.itch.io/unpaused | password: unpaused Sept 2025

- Designed Unpaused, a top-down action game where a college senior with video game addiction visualizes real-life responsibilities as combat encounters, fighting to graduate and secure a job before the academic year ends.
- Created a comprehensive game design document covering all core pillars including gameplay systems (combat, progression, resource management), narrative structure (branching story with multiple endings), world-building, character design, and technical specifications.
- Developed detailed mechanical frameworks featuring a 5-stat skill tree, bullet-hell style combat that scales across 3 difficulty phases, time-management systems tied to a fixed academic calendar, and environmental storytelling showing visual transformation of the protagonist's apartment hub world.

3D Modeling & Environment Design | www.artstation.com/adeoja 2024 - Present

- Hard-surface modeled props in Maya with focus on clean topology, efficient UV layouts, and optimization for real-time rendering.
- Built realistic environments in Unreal Engine 5 leveraging Megascans library and PCG for procedural landscape generation and asset placement.

TECHNICAL SKILLS

Tools: Unity, Autodesk Maya, Unreal Engine, Substance Painter, Photoshop, Figma, Git

Skills: Game Design, Gameplay Programming, 3D Modeling, Texturing, Level Design, Creative Writing, Narrative Design

Certifications: Microsoft C# Certification, Maya Advanced Modeling

Languages: C#

WORK EXPERIENCE

Clicklist Clerk

Kroger

Aug 2021 - May 2023

Frisco, TX

- Led initiatives to streamline closing shift operations in the Kroger Clicklist Department, resulting in an increase in order processing efficiency and a reduction in wait times for customers.

EXTRACURRICULARS

Electronic Game Developers Society | *Member*

Aug 2025 - Present

- Attended technical workshops on Unity development, including C# scripting fundamentals, game polish techniques, memory management, and rapid prototyping for game jams.

Frisco Family Services | *Volunteer*

Dec 2019 - Present

- Duties include assisting resale store customers, restocking items at the food bank, and efficiently sorting and stocking clothing in the store to maintain a welcoming and organized retail environment, while also contributing to community events and charity planning.
